

SCREEN SHOTS

RSA_GEN and RSA_ENC

The screenshot displays the MATLAB environment. The Editor window shows the `Factor_Pairs.m` script with the following code:

```
9 - % Make sure exactly 1 argument is passed
10 - if nargin ~= 1
11 -     error('Factor_Pairs:Invalid_No_Of_Arguments_Passed','This function works with 1 argument N.');
```

The Command Window shows the execution of the `RSA_Gen` and `RSA_Enc` functions:

```
>> RSA_Gen(97,67)

RSA PUBLIC AND PRIVATE KEY GENERATOR STARTED

Input validation in progress...
Input validation completed
Starting operation to generate keys...
Answer:
Public Key = (6499 , 325)
Private Key = (6499, 2125)
N = 6499
d = 2125
e = 325

ans =

    6499

>> RSA_Enc(6499,325,4000)

RSA ENCRYPTION STARTED

Input validation in progress...
Input validation completed
Starting operation to generate ciphertext...

The Cipher Text for Messgae 4000 is 3118

ans =

    3118
```

The Command Window prompt is `fx >> |`.

RSA_DEC

Editor - M:\ELEC5471M_FT16_MATLAB_Project_Oyetoke_Raghuraman\Factor_Pairs.m

Factor_Pairs.m RSA_Dec.m RSA_Enc.m RSA_Gen.m RSA_Hack.m +

```
9 - % Make sure exactly 1 argument is passed
10 - if nargin ~= 1
11 -     error('Factor_Pairs:Invalid_No_Of_Arguments_Passed','This function works with 1 argument N.');
```

Command Window

New to MATLAB? See resources for [Getting Started.](#)

```
N = 6499
d = 2125
e = 325

ans =

    6499

>> RSA_Enc(6499,325,4000)

RSA ENCRYPTION STARTED

Input validation in progress...
Input validation completed
Starting operation to generate ciphertext...

The Cipher Text for Messgae 4000 is 3118

ans =

    3118

>> RSA_Dec(6499, 2125, 3118)

RSA CIPHER TEXT DECIPHERER STARTED

Input validation in progress...
Input validation completed
Starting operation to generate plain text...
The Plain Text for Ciphertext 3118 is 4000

ans =

    4000

fx >> |
```
